Junior Software Developer

My skillset is in Full-Stack Web Development and Project Management. I have experience using HTML, CSS, JavaScript, python and seeing a project through from wireframe to completion. Please view my portfolio www.ericmordiwebdev.co.uk

I am self-motivated and passionate about problem solving, possessing a creative approach while providing effective solutions to make others' life easier through the use of my service. I also have high levels of concentration with a keen eye for detail and report building. I am an excellent communicator able to explain complex information into simple terms. I am a confident team player that enjoys contributing to the success of a team, while just as confident working autonomously, this combined with my thirst to continue to improve and grow is why I have invested my own money into enhancing my craft. I am now seeking the opportunity to work as a Junior Developer in order to further consolidate my knowledge and apply the theory that has been learnt through my studies by working in the field I aim to build a career in.

I am currently studying to achieve my certified diploma in Software Development and also to complete my PRINCE2 in Project Management with the Code Institute and The Learning People. I already have experience in managing projects and building websites for family, friends and assisting developer colleagues (github link above). In addition to a number of transferrable skills such as goal setting, sticking to deadlines and Team Leadership that I have obtained through my extensive work experience (see below). Please visit my website in order to view my portfolio.

Technical Skill Set

Technologies	Databases	Operating Systems	Other Technologies
<ul style="list-style-type: none">• JavaScript/Jquery• HTML/HTML5• CSS3• SASS/SCSS• Ajax• JSON	<ul style="list-style-type: none">• Github• C9.io• Oracle	<ul style="list-style-type: none">• Ubuntu	<ul style="list-style-type: none">• Python• Django

Professional Experience

Carphone Warehouse Customer Consultant

2012 – 2015

It was my responsibility to use my expertise to advise and assist customers in finding the best possible deals to suit their individual needs

Responsibilities:

- Using my problem solving skills to manage the shop floor at peak times ensuring that KPI's are achieved
- Process card and cash transactions, providing invoices, cashing up tills and sorting receipts
- Working towards strict sales targets which has consistently been exceeded
- Constantly keeping up to date with the latest technology advancements in order to promote special offers and deals to customers
- Training new staff members and running the store when management is away

Three Store Sales Advisor

2015– 2016

It was my responsibility to provide excellent customer service and use my expertise in technology to offer the most suitable products to customers. As my experience and knowledge grew, I was also up skilled to become a Team Leader and Key Holder.

Responsibilities:

- Using my timekeeping skills to Open and close store on time
- Handling sensitive customer documents and carrying out credit checks
- Hitting weekly and monthly targets also setting personal goals to continue learning and improving
- Doing stock counts, delivery inventory and general maintenance making sure the store is presentable at all times.
- Providing excellent customer service and utilizing my reputable interpersonal skills, tracking this through customer feedback scores which I received 100% in my second month and consistently kept scores above 95%

- Using Microsoft Excel for logging inventory and checking for any discrepancies
- Using oracle to log customer information and data on new products

11 GCSE's all grade A - C including

- English Lang (A)
- English Lit (B)
- Mathematics(B)
- Physics (A)
- Biology (A)
- Chemistry (A)

Hobbies & Interests

- **Member of The Campus London** – Is a Campus run by Google for tech start-ups to be able to network, discuss projects and bring these amazing ideas to fruition. I regularly attend there numerous events, talks training and mentorship seminars about everything Tech and frequently offer my time and skills to help others on their projects. I attended a workshop run by Brian Kravitz 'Designing for simplicity' which I found to be very enlightening
- **Property Investors Network (2017 – Current)** – I have also run a small family property management company that works with local companies to house their working professionals. Because of this I am also a member of my local PIN and attend their monthly meetings to help out and stay updated with what going on. I have recently updated the site by combining my love for coding and passion for property to create a more up to date and bespoke website for the business from scratch <https://ericmordi123.github.io>
- **Monopoly PR (2014 – Current)** - I also run an events management business with a group of friends in which I organise student events, club nights, comedy nights and themed events. My main job role is to ensure that all aspects of the events are in line with progress reports and kept within the budget and applying my knowledge of technology for Social media marketing and to advertise the events. A great accomplishment was being able to host the 'Croydon Day Party' over the summer which was a huge success.
- **Public Speaker at The Learning people**– I have also been specifically chosen to be a speaker at The Learning Peoples networking and careers event where I have taken the stage to discuss my journey in coding so far, my highlights as well as my challenges and career goals. I really enjoyed doing it as it enables me to hear other like-minded individuals successes and get up to date advice on working in the tech world and also allows me to show others that want to learn to code what is possible when you step outside of your comfort zone.
